Requirement ID	Test Case ID	Tes Scenario Category	Test Case Priority	Test Scenario	Test Case Title	Automation Test (YES/NO)
RQ-LLT-01	TC-LT-1	Positive testing	Critical	User opens look listing page from home page	Verify that look listing page will show some looks in a good layout	YES
	TC-LT-2	Positive testing	High		Verify that a look preview contains image, title and a link to detail page	YES
	TC-LT-3	Positive testing	High	User opens look listing page from another page	Verify that looking listing page wont be broken when user navigates from the different pages to it	
	TC-LT-4	Positive testing	Critical	User scrolls-down/scoll-up at the look listing page	Verify that new images will be loading more when user scroll-down	YES
	TC-LT-5	Positive testing	High		Verify that all existing looks are showing on UI when user's at the end of list	YES
	TC-LT-6	Positive testing	High		Verify that when user scroll-up, system won't refetch images from server	
	TC-LT-7	Positive testing	High		Verify that when user scroll-down the second time, system won't refetch images from server	
		Negative testing	Medium	Present of look listing page in the special cases	Verify look title when changing to max length of allowed tittle	
	TC-LT-8	Negative testing	Medium		Verify page layout, images re-arrange when using different image dimensions	
	TC-LT-9	Basic Performance testing	High		Verify response time of look listing page with different image file size	
	TC-LT-10	Basic Performance testing	High		Verify response time of look listing page when there are many users working(open/scroll down) page at the same time	
	TC-LT-11	Check Responsive	Medium	Users open look listing page on the different Resolution Screen	Verify ui of look listing page on different desktop/laptop resolution screens	

	TC-LT-12	Check Responsive	Medium	Users open look listing page on the different tablet devices Resolution Screen	Verify ui of look listing page on different tablet device resolution screens	
	TC-LT-13	Check Responsive	Medium	Users open look listing page on the different mobile devices Resolution Screen	Verify ui of look listing page on different mobile device resolution screens	
	TC-LT-14	Positive testing	High	User click on the link in each look link	User is able to open the look detail page by clicking on link in each look	YES
	TC-LT-15	Positive testing	High	User click on the each look image	User is able to open the look detail page by clicking on look image	YES
RQ-LLT-02	TC-LT-16	Positive testing	High	User wants to filter look by Living Style	User is able to view all looks in a specific Living Style	YES
	TC-LT-17	Positive testing	High	User wants to filter look by Room	User is able to view all looks in a specific Room Type	YES
	TC-LT-18	Positive testing	High	User wants to filter look by Living Style and Room	Verify filtered result page with only 1 look	YES
	TC-LT-19	testing	High		Verify filtered result page without any look	YES
	TC-LT-20	Positive testing	High		Verify filtered result page with a long listing looks	YES
RQ-LDP-01	TC-LD-01	Positive testing	High	User opens look detail page	Verify that look image with hotspots on look detail page	
	TC-LD-02	Positive testing	High		Verify look name and short caption on look detail page	
	TC-LD-03	Positive testing	High	Mouse hover/ mouse moving on the hotspots in look image	User is able to see the preview of a product when mouse hovering on a hotspot	YES
	TC-LD-04	Positive testing	High		Product preview dialog is closed when mouse moving outside it and hotspot	
RQ-LDP-02	TC-LD-05	Positive testing	High	User can see the list of products associated with opening look detail	Verify that number of associated products in look detail is equal number of hotspots on image	

	TC-LD-06	Positive testing	High		Verify correct name and price of the associated products with the values showing on preview of hotspots	
	TC-LD-07	Positive testing	High		Logined user is able to add an associated product to wishlist by clicking on heart icon at the top right corner	YES
	TC-LD-08	Positive testing	High		Non-login user will be requested to login when adding product from associated list into wishlist	YES
	TC-LD-09	Responsive-checking	High		User is able to open product detail page of an associated product by clicking on it	YES
RQ-LDP-03	TC-LD-10	Positive testing	High	User wants to add products from look detail image into wishlist	Logined user is able to add preview product on look image into wishlist	YES
	TC-LD-11	Positive testing	High		Non-login user will be requested to login when adding product from preview dialog into wishlist	YES
	TC-LD-12	Basic Performance Testing	Medium		Wishlist counter display correct total after adding new product into wishlist from product preview at a hotspot	
	TC-LD-13	Basic Performance Testing	Medium		Check response time of adding product to wishlist when there are many concurrent users	
	TC-LD-14	Positive testing	High	User wants to add products from look detail into shopping cart	Non-login user is able to add one product on look image into shopping cart	
	TC-LD-15	Positive testing	High		Logined user is able to add one product on look image into shopping cart	
	TC-LD-16	Positive testing	High		User is able to choose product size on preview dialog on look image to add into shopping cart	YES
	TC-LD-17	Positive testing	High		User is able to choose quantity (>1) on preview dialog on look image to add into shopping cart	YES

	TC-LD-18	Positive testing	High		User is able to add product from preview dialog on look image into wishlist and then shopping cart	YES
	TC-LD-19	Positive testing	High		User is able to add all products in look image into shopping cart	
	TC-LD-20	Basic Performance Testing	Critical		Check response time of adding product to shopping cart when there are many concurrent users	
	TC-LD-21	Positive testing	High	User wants to view detail of a specific product from preview dialog on look image	User is able to open product detail page on new tab from preview dialog on look image	YES
RQ-LDP-04	TC-LD-22	Positive testing	Medium	User wants to navigate to previous/ next look detail	User is only able to navigate to next look detail page if the first look in the listing page is opening	YES
	TC-LD-23	Positive testing	Medium		User is able to move to the previous look detail if he is on look from the second one	YES
	TC-LD-24	Positive testing	Medium		User is able to move to the previous look detail and next look detail page if he is not at the first one and last one	YES
